

PRIME AQUA

COLOURED SEALER RANGE

FINALLY A WATER BASED ACRYLIC SEALER THAT WORKS!!!

Prime Aqua is a 2 part innovative water based system, utilizing a primer coat and a hard wearing top coat.

Prime Aqua Primer has been formulated with specialty polymers to consolidate, penetrate and bond to masonry surfaces.

Prime Aqua Primer is specifically designed with fine particle size resin and binding agents to provide the strongest adhesion for the Prime Aqua top coating.

- ✓ Prime Aqua Primer has been formulated to extract moisture from the surface which accelerates drying time.
- ✓ Prime Aqua Primer will set in approx. 30 minutes, so a top coat can be applied. (Ambient temperature above 8-10oC).
- ✓ Eliminates concrete dusting and is alkaline/efflorescent resistant.
- ✓ Save time and money with Prime Aqua sealing system by being able to blow off excess surface water and applying Prime Aqua Primer to freshly placed concrete.
- ✓ Unlike xylene based sealers, Prime Aqua is extremely low odour, which is great for indoor and outdoor application and better for the environment.
- ✓ Prime Aqua has superior coverage to that of a xylene based sealer; 9-6 square metres compared to 3-4 square metres, i.e. 150-180 sq compared to 80 sq per 20 litre.
- ✓ Prime Aqua will outlast xylene based sealers by 30%.
- ✓ Protects the surface against foreign contaminants and improves early surface strength/aids moisture retention.

FOR FURTHER APPLICATION INFORMATION, PLEASE REFER TO PRIME AQUA TECHNICAL DATA SHEET VIA WWW.PRIMEEXPOSURE.COM.AU OR SEE YOUR LOCAL STOCKIST.
