

Prime Evaploc on Retarder

MANUFACTURED FOR CONCRETTERS BY CONCRETTERS AFTER EXTENSIVE PRODUCT TESTING

DESCRIPTION – Prime Evaploc is a water soluble liquid when sprayed on curing concrete creates a plastic film that retards water evaporation in setting concrete. This enables you to use Prime Exposure Evaploc as a liquid polythene to reduce the dehydration of Prime Exposure Retarder in Windy/Warm conditions.

BENEFITS –

- Reduces wash off time by 50%
- Greatly reduces the chance of hairline cracking/plastic shrinkage.
- Perfect for limited access area's and windy conditions were you are unable to cover with polythene.
- Outperforms covering with polythene because its applied directly on the Retarder eliminating any dehydration between the Retarder and protective layer.

Direction of use

Once you have applied Prime Exposure Retarder in warm/ windy conditions it will lose its fluoro colouring and Set in around 20-30 minutes, the Exposed Aggregate Concrete surface should get a slight glazed look.

Mix 1 litre of PRIME EVAPLOC concentrate with 2 litres of water.

The objective is to create a thick protective layer over the Retarder, so in extreme weather you can up the concentration level as required.

10 litres of diluted PRIME EVAPLOC will cover approximately 50 square meters of concrete. For easy application use a PRIME BACKPACK SPRAY UNIT or any garden sprayer.

By taking this protective measure you will half your wash off time by 50% and greatly reduce hairlines/plastic shrinkage.

CLEANING – Prime Evaploc is a water soluble product that is preferably cleaned in hot water however cold water can be used.

SAFETY INSTRUCTIONS – PRIME EVAPLOC is slightly alkaline. Avoid contact with skin and eyes. Wear suitable protective clothing (goggles, impervious footwear and gloves) when handling. If poisoning occurs seek medical advice. PRIME EVAPLOC should not be stored in metal containers for long periods.

FIRST AID – Wash skin thoroughly and remove contaminated clothing. Eye – Hold open and flood with water for 15 minutes. Ingestion - DO NOT Induce vomiting. Give a glass of water after rinsing mouth.
